

Comprehensive School Safety Assessment Suite Family Safety Plan

Mobile digital toolset and methodology to help families with children to prepare for emergencies and disasters by asking a set of child-centered questions and providing them practical guidance based on best practices.

- The Family Safety Plan (FSP) questionnaire is divided into seven sections:

1. Hazard Identification, 2. Risk Reduction, 3. Response Skills, 4. Cyclone, 5. Earthquake/ Tsunami, 6. Drought and 7. Disease Outbreak.

- The information collected is used to produce personalized FSPs and to monitor and encourage progress towards community disaster risk reduction and resilience.

- Each family's personal information is safely stored on the FSP Portal for only the family's use.

- Access to different levels of summary information is authorized by the custodian of the FSP digital toolset.

- Automated sub-national and national level reports are available via the Portal for planning and decision-making.

- Family Safety Plans and aggregate reports are downloadable.

- First implementation is in Fiji.
